

Q1. APPLIED PHYSIOLOGY AND KINESIOLOGY (APK) INTERNSHIP SITE APPROVAL FORM

## Q2.

The **Department of Applied Physiology and Kinesiology** (APK) at the University of Florida would like to thank you in advance for taking the time to complete the approval process and your willingness to provide valuable internship opportunities to our students. The Department of APK requires that all undergraduates complete a 12-credit internship experience and graduate students complete a 5-credit internship experience during their final semester. The experience requires a minimum of 520 clock hours for undergraduates and 600 clock hours for graduate students, or 35-40 hours a week for 15 weeks, for the Fall and Spring semesters or 40-45 hours a week for 13 weeks, for the Summer semester. Ideally, interns become exposed to the tasks that will be required of them as professionals in the field, as well as receive opportunities to develop their skills and areas of interest within their specialization. The specializations within the department are:

**Exercise Physiology (Undergraduate)**: Prepares students interested in pursuing a career in one of the health professions or graduate study in exercise science. The curriculum provides a strong basic science background and requires additional course work in the biological aspects of exercise. For intern hours in this specialization, students are expected to complete hours in a biomedical research setting related to exercise and/or sport.

**Fitness/Wellness (Undergraduate)**: prepares students to function as an exercise technician, exercise specialist, and/or wellness instructor in hospital, corporate, private, or governmental agencies. The curriculum emphasizes practical aspects of fitness and wellness.

**Human Performance (Graduate)**: The Human Performance concentration is a non-thesis program leading to a Master of Science degree in Applied Physiology and Kinesiology. Its purpose is to train students for careers where they can promote scientifically based exercise, wellness, and psychological factors to enhance health, athletic development and/or movement performance. Furthermore, students will be trained to be an integral part of the health care team that administers, assesses, and develops programs for clinical populations.

Please review the <u>APK Internship Policies and Procedures</u> Document to gain a better understanding of the expectations of students and site supervisors during the experience.

Q5. Organization Name
Hotworx
Q6. Organization Location(s) - Include Addresses Of All Locations To Be Included As Part Of This Approval
3265 SW 34th St. Gainesville Fl 32608
Q7. Name of Individual Who Will Receive Applications From Students
Stephanie Franz
Q8. Email Address of Individual Who Will Receive Applications From Students
manager.hwx.gainesville.uf@gmail.com
Q9. Phone Number of Individual Who Will Receive Applications From Students

Q30. Sigr	nature of Individual Who Will Be Receiving Inte	ernship Applications	

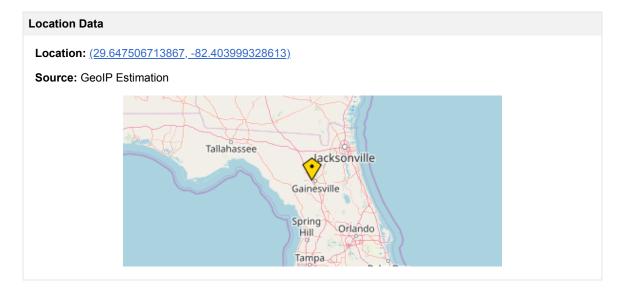

A typical day for the intern would be engaging with clients by assessing the health and fitness of individuals and prescribing specific physical activity

based on those assessments. The intern would be required to collect and interpret data on the clients in an applied physiology and kinesiology context. They will also be required to create exposure to the organization's operating structure by maintaining retention with all clients. We also prefer the intern to have background in marketing activities related to health and fitness, such as designing fitness plans that demonstrate specific exercises and their

Q31. Signature of Individual Who Will Be Supervising And Evaluating Students During The Internship

Approved: 11.15.19

Blain Harrison, APK Internship Coordinator
