COURSE DESCRIPTION: Mental and psychological techniques and strategies to improve performance and achievement in sport and exercise.

COURSE OVERVIEW: APK 6408 - Performance Enhancement examines the cognitive, social, behavioral, and neurophysiological factors that influence performance in sport and other motor performance endeavors. The field of sport psychology actively promotes the scientist-practitioner model. Utilization of the scientist-practitioner model involves the ability to consume and appropriately apply contemporary theory and scientific findings to the practice of applied sport psychology. Accordingly, APK 6408 will explore how sport psychology science and theory inform practical application of psychological skills interventions.

Topics covered include examining how psychological factors and psychological skills training programs can be leveraged to enhance performance from the perspectives of youth sport; expertise development; practice structure; diversity; leadership; teams; athlete burnout; athlete coping; and athlete transition.

PREREQUISITE KNOWLEDGE AND SKILLS: Students must hold Graduate Student classification based on the UF Registrar's class Student Classifications system

(<https://catalog.ufl.edu/UGRD/academic-regulations/student-classifications/>). Or, students must acquire instructor approval.
