**Lecture Exams** – Each exam will consist of multiple-choice, true-false and short answer questions. Students will complete the exam in class on the day designated on the course schedule.

**Module Quizzes** – A quiz pertaining to each week's module will be assigned each Friday throughout the semester. The 10 to 15 question quiz will be available for 12 hours and students will have 25 min to complete it, once they open the quiz. Module quizzes are open-book and open-note with questions focusing on the practical application of course material.

**Comprehensive Final** – The final exam will consist of multiple-choice, true-false, and short answer questions each worth 1 point and 4 short-answer question each worth 10 points. ## **SUCCESS AND STUDY TIPS:**

- Snow-ball the lecture notes. Begin studying lecture material immediately after the first lecture. Then, after the second lecture, begin your studies with day one lecture material. Continue this all the way up to the exam.
- If you get lost, don't understand the material or an assignment ask the instructor. That's what instructors are here for; to help you learn.
- While you're studying and trying to fully understand the material, engage your classmates. This material is meant to be discussed and used...
- Everything that we cover in lecture could be used for an exam.
- Rather than memorizing tables and charts, look at the tables and graphs and see what trends or themes you can determine from those. Can you describe what you see and what the significance is?
- Lastly, try not to get overwhelmed by the material for this class, and just have fun.
